

# Public Lecture:

## *Effect of Proximity to Light Rail Transit on Property Value*

### **The School of Geography, Planning and Architecture**

invites you to attend a public lecture presented by

**Associate Professor Daniel B. Hess**

*The University at Buffalo- The State University of New York*

**At 11:00am on Tuesday 21st of October, 2008**

**Chamberlain Building 35, Room 519**

Central to Dr. Hess' research agenda is interpreting how the built environment of cities (and the public policies that support this form) influences travel behavior. He uses an array of research methods to interpret how policies affect travel choices and how methodologically we can best analyze urban spatial dynamics. Access to employment for welfare recipients and low-wage workers is one of Dr. Hess' concerns, and he has conducted evaluations of policy and practice in California and New York. Dr. Hess is particularly interested in transit system performance and alternative transit funding arrangements, and he has conducted evaluations of employer and university transit pass programs.
