

Friday 17 March 2006

12.00 noon – 2.30pm

Kathleen Room  
UQ Staff Club

A light lunch will be provided  
Seats are limited  
Parking in Staff House Road

The School of Geography Planning and Architecture expands the debate about Brisbane's Urban Water Future in this inter-disciplinary colloquium of expert speakers from Government, Industry and within the Faculty of Engineering, Physical Sciences and Architecture (EPSA).

### Urban Water Futures for SEQ

is aimed at examining the relevance of water to the built environment, with a particular emphasis on the 200km city.

Presentations from five leading speakers will be followed by a series of questions put to a panel of SEQ experts that will interrogate what the future of urban water might be: How does current thinking in urban planning propose to cope with the increasing water crisis? What innovations are being tested? Where do we go from here?

This event has been organised by Dr Kathi Holt-Damant in collaboration with the Graduate School of Architecture Planning & Preservation, Columbia University, New York.

## Colloquium Series

# Urban Water Futures for SEQ
